

TECHNICAL DATA SHEET

Anti-051

Anti-051 is a mixture of biocide grades that provide the instant kill microorganisms. Such as bacteria, mold, fungi, termite and virus.

Anti-051 is a biocide providing a broad spectrum of protection from fungi, yeast, insect and bacteria for wood chips, polymers, dispersions, adhesives, paints, many households, institutional and industrial formulations, and other coating system.

Anti-051 have the indicator that can tell whether the chemical and applied cover all surface or not.

Anti-051 is free solvents and formaldehyde.

Properties:

Appearance	:	Pale blue / green clear liquid.
Density (20°C)	:	1.022 - 1.032 g/ml.
Odour	:	Mild.
Solubility	:	Fully soluble in water.
Shelf life	:	24 months

Recommendation Dosage:

PB/MDF 0.1 - 0.3% of dry chip, OSB 10 - 20% of dry chip, polymer dispersions, adhesives, paints and other coating system 0.1 - 0.3% of total weight product.

The level necessary to protect a formulation depends on the composition of the formulation and the intended and use conditions. All suggested dosage should be evaluated prior to commercialization for compatibility and storage stability.

Storage conditions:

Store only in the original container. Prevent release to the environment by adequate secondary containment and use of appropriate spill control procedures.

Further Information:

Product technical information and data is based on the best information available and does not constitute or imply a warranty or patent infringement of any kind. The user is responsible for testing product suitability prior to use in production.
