

TECHNICAL DATA SHEET

KLD-201N

- KLD-201N** is a combination of high performance release agent and wetting agent for PMDI glue to use with MDF and OSB manufacturer
- KLD-201N** can be diluted 1:10 - 1:50 with water and must be sprayed continuously on the chips/fibres, press plates and hot steel belt.
- KLD-201N** is also suitable for the production of thin boards.
- KLD-201N** Can be used with high hardness water to protect nozzle clogging problem.

KLD-201N can be used at:

- Single presses
- Multidaylight presses
- Continuous presses
- Spray system

Advantages:

- No build up on the press plates
- Excellent surface of the produced board
- Better flow properties and distribution of the glue
- Reduction of press cycle time
- High cleaning power
- Environmental friendly

Technical Properties:

Density	:	0.997 g/cm ³
Colour	:	Yellowish Clear
Shelf life	:	12 months

Further Information:

Product technical information and data is based on the best information available and does not constitute or imply a warranty or patent infringement of any kind. The user is responsible for testing product suitability prior to use in production.
