

TECHNICAL DATA SHEET

KLO-209K

Product description :

KLO-209K is a unique polymer having improved release properties and design for semi-permanent coating of rubber part application

KLO-209K can design for reduce film transfer to rubber part

Properties:

Appearance	:	Milky
Density	:	0.99 g/cm ³
Non-volatile	:	1-2
Shelf life	:	12 months

Advantage:

- Water-based and safety to the environment and worker
- Easy to apply by both spraying or wiping
- High slip and glossy
- Production line can be run smoothly since KLO-209K provide multiple releases

Application:

- Thoroughly clean the mould. Apply at least two uniform, thin coats before it goes to production. Allow a short drying time between each coat
- Reapply a light coat of KLO-209K at process temperature when required, to maintain the desired release
- The application can be spraying or wiping
